Full-length, CD-quality musical compositions - not MIDI.

---

Halloween Desktop	Halloween01.exe	2.519 MB	Free
-------------------	-----------------	----------	------

---

Put some Halloween spirit on your desktop with this skin suite. It is a suite of skins that supports the 3 most popular customization programs - WindowBlinds, ICQPlus, and DesktopX. This program will automatically install and if necessary allow you to easily download the necessary programs to utilize. It's really fun, sound effects, animated ghosts, and a cool new Halloween desktop GUI.

---

Halloween Cursors	Halloween_Cursors.exe	135 KB	Free
-------------------	-----------------------	--------	------

---

Halloween Cursors lets Web surfers and Web developers use cool Halloween icons and mouse pointers in place of the black and white arrow cursor. Available cursors include Frankenstein, Dracula, ghosts, jack-o'-lanterns, skulls, and more.

---

SpyBot	Spybotsd12.exe	3.577 MB	Free
--------	----------------	----------	------

---

Spybot - Search & Destroy can detect and remove spyware of different kinds from your computer. Spyware is a relatively new kind of threat that common anti-virus applications do not yet cover. If you see new toolbars in your Internet Explorer that you didn't intentionally install, if your browser crashes, or if your browser start page has changed without your knowing, you most probably have spyware. But even if you don't see anything, you may be infected, because more and more spyware is emerging that is silently tracking your surfing behavior to create a marketing profile of you that will be sold to advertisement companies. Spybot-S&D is free, so there's no harm in trying to see if something snooped into your computer, too :)

Other computer safety products available for reasonable cost at:
