Ad-Aware List Update

This download is for use with Ad-ware 6 build 181 and higher only. Manual Installation: Unzip the archive, replace the existing file and restart Ad-aware. You can also use the webupdate component implemented in Ad-aware to install this update. Free (relist.zip)

Advanced Searchbar

Search over 60 search engines and includes a built-in software to eliminate annoying pop-up (pop-up, pop-under, and exit pop-ups) advertisements, screensaver launcher, Calculator, Free Games (46+ PC/Internet/Multiplayer/Flash Games), Media players (CD, DVD, MPEG, MP3…), Sound Recorder, System Utilities, Computer Disk Utilities, Windows Registry Utilities, Webpage Translation (6 Languages), Online News Providers (12 News Sites), Greetings Sites, Works with other Toolbars like Google, Yahoo… No Spyware/Adware/Malware. Easy Install & Easy Un-install. Free (Advanced Searchbar)

Avery Design Pro

Print professionally looking mailing labels, CD/DVD labels, business cards, dividers, t-shirt transfers, and much more. Includes 550+ Avery product templates, customizable projects, unique fonts, mail merge, postal bar codes, and much more. Free (Avery DesignPro 4.0)

Debt Killer

DebtKiller.com software shows you how to pay off your home, cars and credit cards in about 5 to 7 years using only the money you already make. DebtKiller.com software reviews 13 different ways of paying off your debt and automatically calculates the fastest way possible to make you debt free. Free (debt_killer.exe)

Google Toolbar

Take the power of Google with you anywhere on the web. The Google Toolbar enables you to search the web from any site, block unwanted pop-up ads, fill in forms with just one click, search within the pages of any site and highlight the words you searched for on a page. The Google Toolbar is free and installs in just seconds. Get one click closer to the information you want to find. Download the Google Toolbar. Free (setup_CNDB.exe)

MP3 Music player

For playing MP3 files kept under the My Music folder, or some other folder organized in a similar hierarchal manner. It was developed for quick and easy playing only, not (yet) suitable for creating/maintaining libraries, mixes, or permanent playlists. Works very well for intended purpose, especially if you like radio-like play of your favorite music, but without commercials! Random play of either single songs or entire folder contents (CD), repeat playlist, list manipulation, and file searching options. Very intuitive, most operations performed with a single mouse click, control-tip/tool-tip/roll-over help for everything. A lot of software for the money! Free (mpThreePO 2.3.1)

Pepper Keeper Sampler

Instant sharing and collaboration: Use the Pepper Keeper and Pepper Packages to stay connected. Create a photo album or scrapbook and share it via IM or e-mail with your friends. Collaborate on school or work projects using the scrapbook or homework package. Work together to make something digital. Free (Pepper keeper)

SETI

SETI@home is a scientific experiment that harnesses the power of hundreds of thousands of Internet-connected computers in the search for extraterrestrial intelligence (SETI). You can participate by running this screensaver, which downloads and analyzes radio-telescope data. There's a small but captivating possibility that your computer will detect the faint murmur of a civilization beyond Earth. Free (Seti@home)

Speech Reader

This free and fully functional text-to-speech software lets your computer read any part of the news, weather forecasts, and your e-mail. The application also can read Word documents, rich text files, and PDF files. The speaking speed and voice quality can be changed at your wish. You can also save voice as WAV files, so you can listen later or burn them onto a CD. To read Internet news, just click an IE icon or menu, and to hear other text, just click Copy, and the computer will read selected text back to you. The main difference between the Standard and the Enterprise versions is that Enterprise supports and contains AT&T Natural Voices, but Standard uses Microsoft Voices. Free (Natural Voice Text to Speech Reader Standard 3.6)

Ultimate Popup Defence

Stop annoying pop-up ads forever. Popup Defence Pro is a free pop-up destroying application that will let you browse the Web without annoying ads that suddenly pop-up when you visit Web sites. Popup Defence Pro uses patent-pending pop-up blocking technology to block unwanted pop-up ads and still allow the ones you want. There's no need to adjust proxy settings, or add sites to a list. Popup Defence Pro will not strip Web images or slow your browser. You can allow pop-up windows only when you want them. Popup Defence Pro is not advertising supported, nor does it require registration, and no information is collected from or about product users. Popup Defence Pro is very small and easy to use. It is complete with full install and uninstall, a complete setup wizard, and online help file, and free unlimited tech support. Free (Ultimate Popup Defence)

Weather Depot

Weather Depot is desktop weather software that puts your current conditions in the taskbar. It's desktop weather software that has a TV-style weather ticker that scrolls forecasts, current observations, and optional severe weather and personal forecast alerts. It's desktop weather software that gives you access to thousands of maps, up to 12-day extended forecasts, historical observations, severe weather data, animated radar, almanac data, travel delays, and much more. It is offered as spyware and pop-up advertisement free because we just want you to get the weather. Additionally, all of the software updates are free of charge. Free (Weather Depot)

XP Suite

XP Suite's collection has grown to 33 controls specifically designed to give applications the look and feel of Windows XP regardless of the operating system. The collection includes a tab, text box, multiline textbox, maskedit, progress bar, progress wait, progress step, balloon tip, balloon message, menubar, pop-up menu, side menu bar, label, status bar, combo, combo multicolumn, listview, listbox, command button, spin, slider, updown, scroll bars, image, image list, frame, panel, check box, option, time picker, date picker, and calendar. Each control features the XP Luna theme with all three color schemes (XPBlue, XPSilver, and XPOlive). New to this version is the VisualStyle feature. Built into each control, you now can give your apps the look and feel of 2003, Net, and IE. (XPsuite208Setuo.zip)
