

WAC DOM for May 2004

Desk Buddy Lite **Free** **Desk Buddylite.exe** **1,571 KB**

This collection of tools eliminates the need for all those small utilities cluttering your desktop. It has a diary, notepad, an alarm clock and more.

Distant Suns – Screensaver **Free** **ds_ss_install.exe** **2,320 KB**

Grand Tour 3D Screensaver is a high-speed, full-motion, solar-system simulator using OpenGL technology and accelerated graphics. The positions and rotations of each of the planets and its moons are accurate to the current date and time (making the program a clock of sorts). As the day progresses, you can observe the great red spot of Jupiter as it wheels across the face of the giant planet. Watch the moons of Saturn in their daily dance around the majestic ringed world, and watch Earth rotate under your feet. The constantly changing scenes assure an infinite variety of interplanetary vistas.

Grand Tour 3D now comes with Phobos and Deimos, the moons of Mars, and features the Mars Rover landing sites.

DVD Profiler **Free** **dvdpro.zip** **3,914 KB**

This can manage any size DVD collection. It provides extensive data collection information, filtering, statistics and reporting features specific to the DVD format.

This is Internet connected for sharing profiles. It connects to the online DVD database at IVS

Fresh View 2.0 **Free** **Freshview.exe** **1,223 KB**

This free software helps you organize and view multimedia files (images, audio, and video). It gives you the ability to watch movies, listen to music, and view graphics in a slide show. Image files in a folder can be displayed using a number of views, including a thumbnail view that lets you quickly see what your images are without having to open them. You can convert graphics from one type to another, print, and create HTML albums. This easy-to-use software supports 86 multimedia formats, including JPEG, GIF, PNG, TIFF, PSD, Photo CD, TGA, MP3, MIDI, MOD, AVI, and MPEG. The latest version features external editor program support.

IconCool **Free to Try - \$19.95 to Buy** **iconed4.exe** **4,337 KB**

Icon Editor is an easy-to-use icon editor that has all the functions for creating and editing ICO, ANI, CUR, GIF, JPEG, WMF, EMF, TGA, and WBMP files. You can convert images in 25 formats to icons, and you can modify or replace icon images in EXE, DLL, ICL, or any other types of files directly. The program has 60 image filters, including Blurring, Sharpening, Embossing, Diffusing, and Color Balance. It has 15 image effects, including Linear Gradient, Radial Gradient, Rectangular Gradient, WAV, 3D Shadow, 3D Button, Text Gradient Effects, Noise, and Arbitrary Rotation. It has a smart image-capturing tool, which can be used to capture various-size images from desktops or from any other software. It supports Windows XP icons in 32-bit color depth with an alpha channel; now you can create semitransparent XP icons easily.

Kirby Alarm **Free** **kirbyalarmsetup_v2.11.exe** **2,530 KB**

Kirby Alarm is a completely free alarm and task scheduler that will pop up a note, or run a program, or play a sound, or send an email at user defined intervals. Various options are available to set alarms/programs to run every x minutes/hours/days/months/years, or the last Friday in the month, or the last day in the month plus lots more. Unique features to not skip missed alarms, and conditional execution of alarm based on a 'watch file'

Pardon

Pardon **Free** **Pardon.exe** **5,749 KB**

This dictionary utility provides access to extensive dictionaries, with cross-references and text formatting. You can look up words and use "wildcards" for advanced searches. There is a vocabulary test tool and comprehensive documentation. Additional modules can be downloaded from the Internet.

Post-it Software Notes	Free	pn30lous.exe	2,444 KB
-------------------------------	-------------	---------------------	-----------------

What happens when you cross a Post-it Note with a computer? Post-it Software Notes - the classic yellow note designed for your PC! Use the software from the company that invented the Post-it Note. This digital version of 3M's famous canary yellow note is perfect for quick reminders on your computer desktop so you never miss a meeting, event, or thought. With the free Lite version of Post-it Software Notes, you can create your own notes with pictures and hyperlinks, stick notes on your computer desktop, and add alarms to your notes as reminders. You can also subscribe to receive information on a Post-it Software Note from Web sites that provide this service!

Quick2Do	Free	q2dsetup.zip	807 KB
-----------------	-------------	---------------------	---------------

This application offers you a fast, simple method of recording your to-do list. Its automatic coloring feature helps you easily recognize your tasks' priorities and statuses. The program also sorts your task entries based on sub-class.

TimeCalendar	Free	TCLE163.exe	1,270 KB
---------------------	-------------	--------------------	-----------------

TimeCalendar offers 20 different views. See everything from a single day to an entire year. You can split your everyday planning into different layers and share them. Other features include recurrent events, a task list, and an alarm with snooze.

Window Blinds	Free to Try \$20.00 to buy	windowblinds4_public.exe	4,650 KB
----------------------	-----------------------------------	---------------------------------	-----------------

Customize the look and feel of Windows 2000 or Windows XP with WindowBlinds. It can change virtually every aspect of the Windows GUI such as title bars, push buttons, the Start bar, radio buttons, scrollbars and more. WindowBlinds is what Microsoft, nVidia, ATI, Nintendo, and many other companies use to provide additional visual styles for Windows users. Try it for yourself. WindowBlinds 4.2 supports changing the toolbar icons in Internet Explorer and Explorer as well as changing the progress animations (copy, move, delete).
