

### At the table in the back of the room WACUG:

- Go to <a href="http://wacug.org/">http://wacug.org/</a>
- Select "Recent Meeting Topics"

#### **OLLI Computer Club:**

- Go to <a href="http://www.olli.gmu.edu/">http://www.olli.gmu.edu/</a>
- Select "Other" → "Computer Club"
- Select "Recent Meetings"

#### Outline

- The threat
- What information to encrypt
- What is encryption?
- Encryption products
  - Cypherix LE
  - TrueCrypt
- Downloading TrueCrypt
- Using a TrueCrypt vault

### The Threat

- Deleted files → recycle bin are not erased
- Files emptied from the recycle bin are not erased
- Laptops are targets for thieves (~600,000/year stolen or lost)
- Intruders can "farm" your computer for private information via the Internet
- Very easy to search for "password", "social security" "bank" "login", etc.

### What Happens When a File is Deleted?

- File is marked as deleted in the Master File Table (MFT)
- Clusters allocated to the file are marked as free in \$BitMap (1 cluster = 4 KB)
- The actual data remain on the disk until clusters are re-used
- For more information, see

### What to Encrypt

#### Financial data

- Credit card information
- Tax records
- Social Security numbers
- Bank statements
- Payroll or pension payments
- Receipts

## What to Encrypt (cont.)

- Medical information
- Legal documents
- Collections of IDs & Passwords
- Private correspondence

### What is Encryption?

- Encryption is scrambling of information in a systematic and recoverable manner
  - to ensure privacy and security

### How Much Protection Is Needed?

- Guaranteed privacy & security is impossible
- Excellent privacy & security is easily achievable
- Reasonable protection encourages the "bad guys" to look for an easier mark

#### In other words:

- If your house is locked and your neighbor's isn't, guess where the thief goes?
- If you and your friend are chased by an angry, hungry bear—you don't need to outrun the bear... just your friend!

# Password Management

- Login with one master password and one click; fill forms automatically
- RoboForm (\$29.95 and \$9.95)...
- LastPass (free)...
- Password Safe (free from SourceForge)...
- SecureIT (free)...

## Encrypt Microsoft Office Files

- MS Office documents (Word, Excel and PowerPoint) can be encrypted (a) to open and/or (b) to modify
- For instructions, see 🗈
- Office 2007 uses strong encryption, but requires good password. How secure is this encryption? See

## Creating Strong Passwords

- Very poor passwords:
  - password
  - guest
  - test
  - admin
  - garson
  - any single word
  - <8 characters, etc.

## Creating Strong Passwords (cont.)

- Strong, but forgettable passwords:
  - CQL\$8eMOy@8z01P
  - 86CBA1D7CEB8B0F
  - 6387C73F825A2C298796C3B7B7EA9F
  - 7@iB%tuD6i3tUA&ZQ2s6UjG5sWTS6G
  - h1L#v3EJMyD\*x#fjGpRrcD3J&e8ZNP5uZT0T2@by
- Discussion of strong passwords, see

## Creating Strong Passwords (cont.)

- Strong, practical passwords:
  - 2BeeOarKnot2Bea?
  - NaturalLog2.71828
  - AMoleIs6.02x1023
  - ILieIWasBornIn1777
- For picking strong passwords, see
- To check strength of passwords, see the https://www.microsoft.com/protect/fraud/passwords/checker.aspx

## Creating Strong Passwords (cont.)

RoboForm "Tools" to generate random passwords

## Creating Strong Passwords (cont.)

See <a href="http://www.passwordcard.org/en">http://www.passwordcard.org/en</a> for PassWord card

### General Encryption **Products**

- Cypherix\* LE 8.1.0.0 (LE free; other products for sale)
  - Download

For more information...

- TrueCrypt 6.3a (free)
  - Download
  - For more information...

<sup>\*</sup>Formerly known as Cryptainer

### General Encryption Products (cont.)

- Androsa FileProtector (free)

- AxCrypt (free)
- PowerCrypt (free)
- CryptoForge (\$30-\$40)
- Symantec Endpoint Encryption\* (\$133)
- PGP\*\* (Pretty Good Privacy) and Philip Zimmerman

<sup>\*</sup> Symantec to acquire PGP Corp. and Guardian Edge Technologies, Inc. (1)

<sup>\*\*</sup> See Wikipedia discussion

### Cypherix LE (free)

- Creates containers (vaults) up to 25 MB each
- Create vaults on hard drives, thumb drives, CDs, DVDs, etc.
- Drag and drop files or folders into vaults
- Secure e-mail
- 128 bit Blowfish encryption

#### **Cypherix Products**

No. of Licenses	Cypherix ME 2.5 GB vaults	Cypherix PE 25 GB vaults	Cypherix 8.1 500 GB vaults	Cypherix SE 500 GB vaults	SecureIT
	Price	Price	Price	Price	Price
1	\$29.95	\$45.00	\$69.95		\$29.95
2	\$49.95	\$79.95	\$129.95	\$129.95	\$49.95
3	\$74.95	\$119.95	\$194.95	\$194.95	\$74.95
5	\$124.95	\$199.95	\$324.95	\$324.95	\$124.95
10	\$249.95	\$399.95	\$649.95	\$649.95	\$249.95
20	\$499.95	\$799.95	\$1299.95	\$1299.95	\$499.95
25	\$623.95	\$998.95	\$1524.95	\$1524.95	\$623.95

For more than 25 Licenses, please contact us for pricing information.

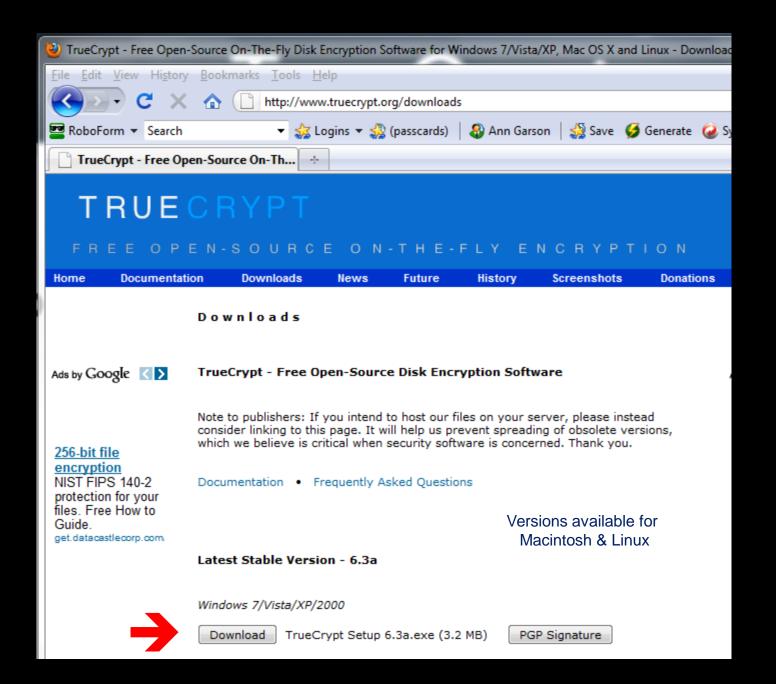

### TrueCrypt 6.3a

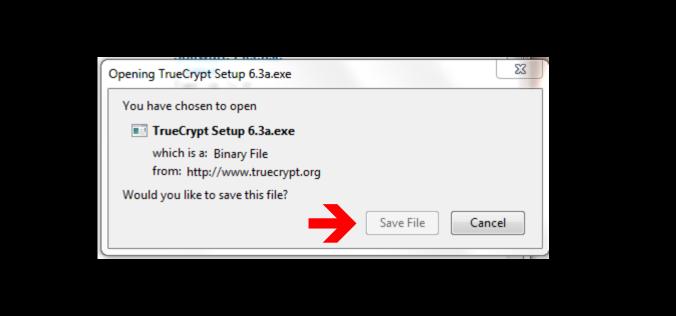

- Creates a virtual encrypted disk in a file
- Encrypt a entire hard drive, USB flash drive, CD, DVD, etc.
- Encrypts automatically in real time
- Drag and drop files or folders into vaults
- Secure e-mail (by attaching a small vault)
- 256 bit AES\* encryption

<sup>\*</sup>Advanced Encryption Standard

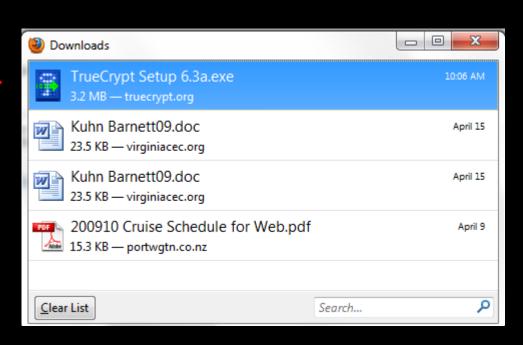

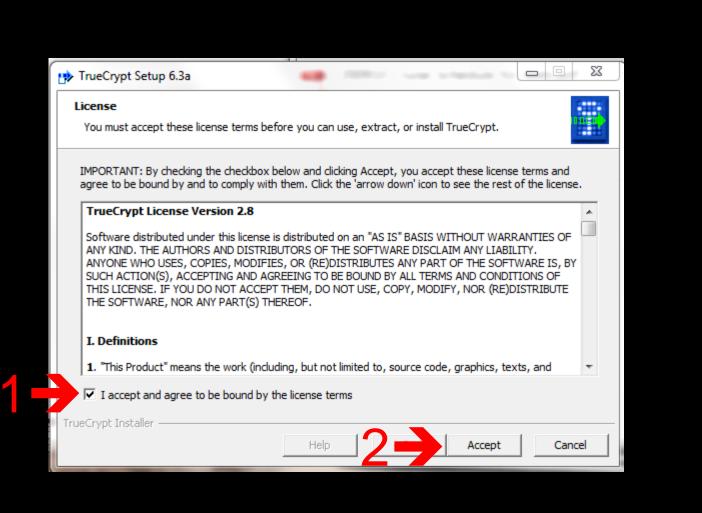

Go to <a href="http://www.truecrypt.org/downloads">http://www.truecrypt.org/downloads</a>

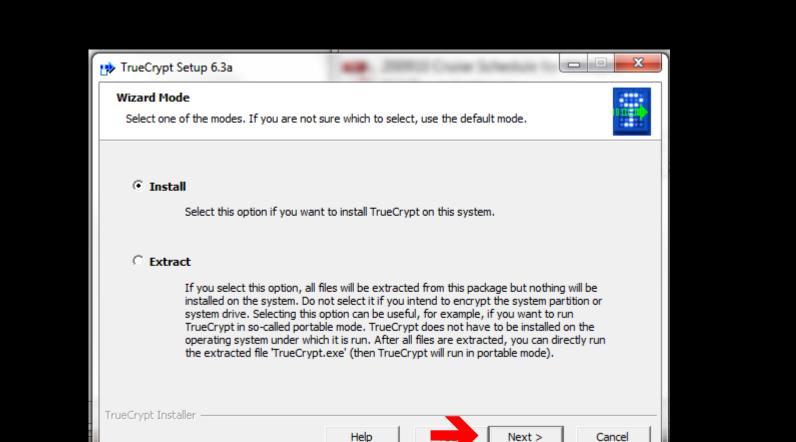

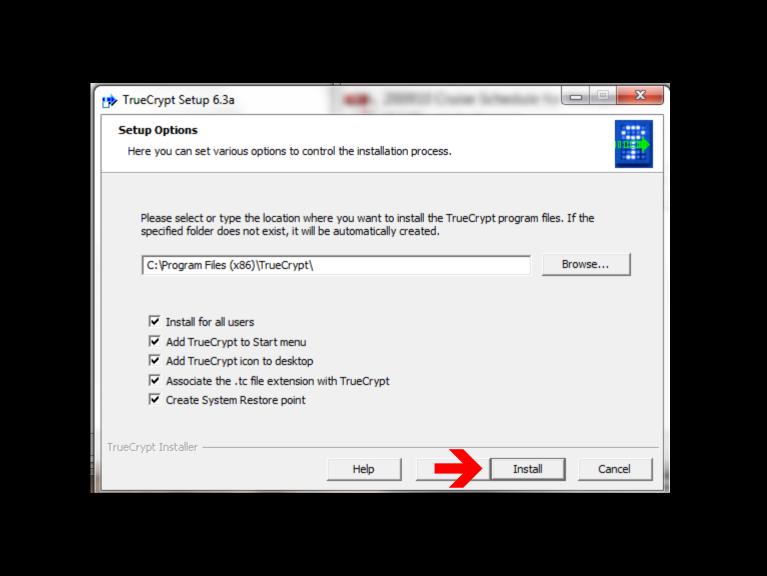

### Double Click

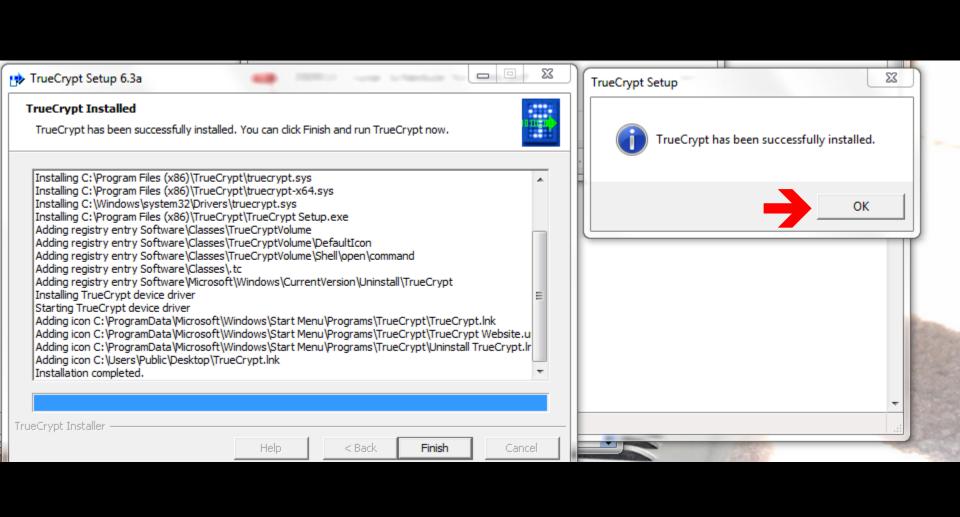

Cancel

TrueCrypt 6.3a has now been installed

## Creating a TrueCrypt Safe

Windows 7 Toolbar

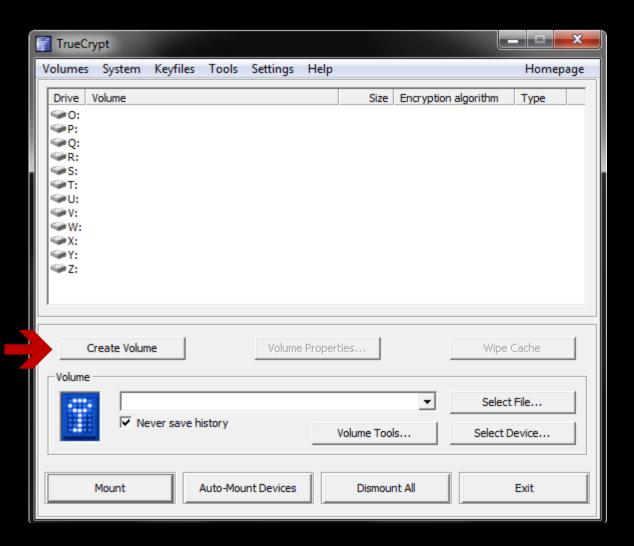

Volume = safe = vault = secure container

#### TrueCrypt Volume Creation Wizard

Create an encrypted file container

Creates a virtual encrypted disk within a file. Recommended for inexperienced users.

More information

#### C Encrypt a non-system partition/drive

Encrypts a non-system partition on any internal or external drive (e.g. a flash drive). Optionally, creates a hidden volume.

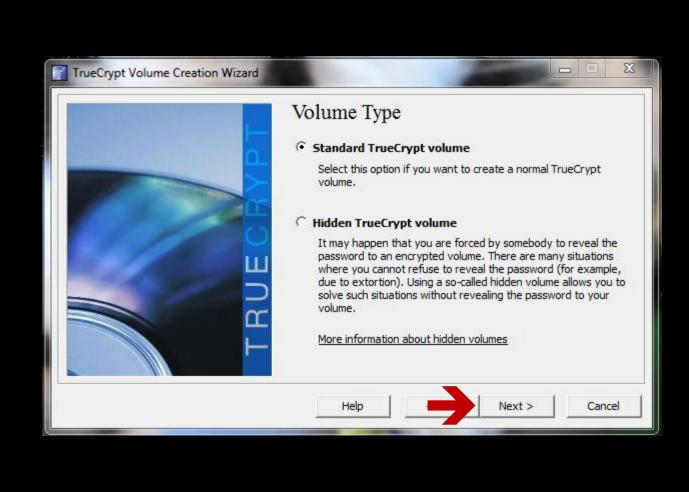

#### C Encrypt the system partition or entire system drive

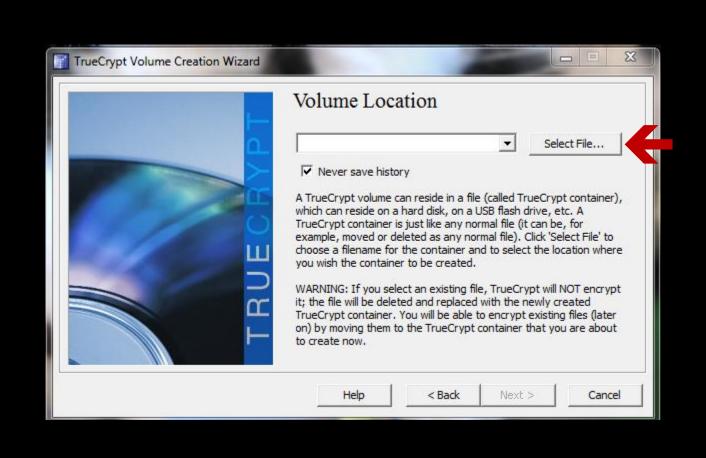

Encrypts the partition/drive where Windows is installed. Anyone who wants to gain access and use the system, read and write files, etc., will need to enter the correct password each time before Windows boots. Optionally, creates a hidden system.

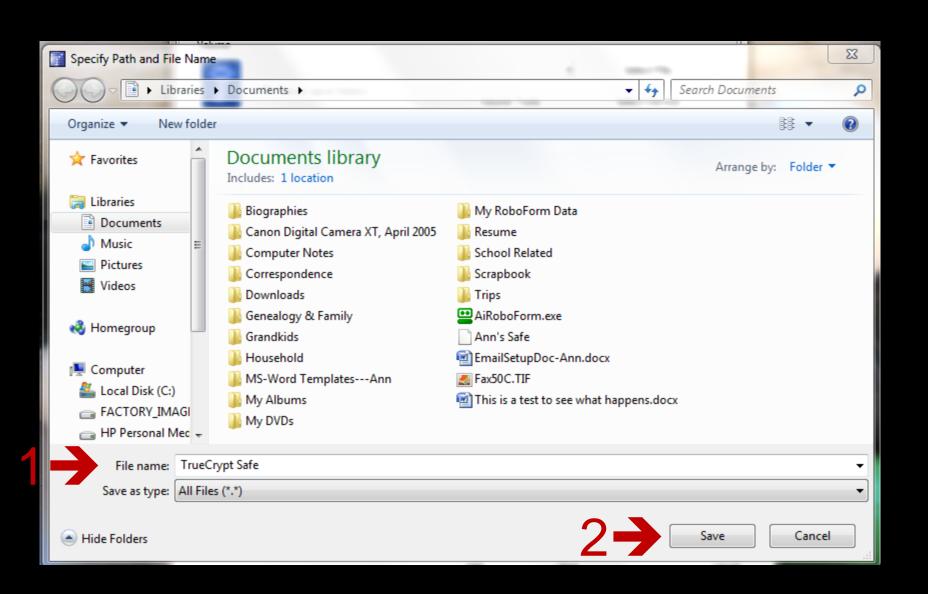

More information about system encryption

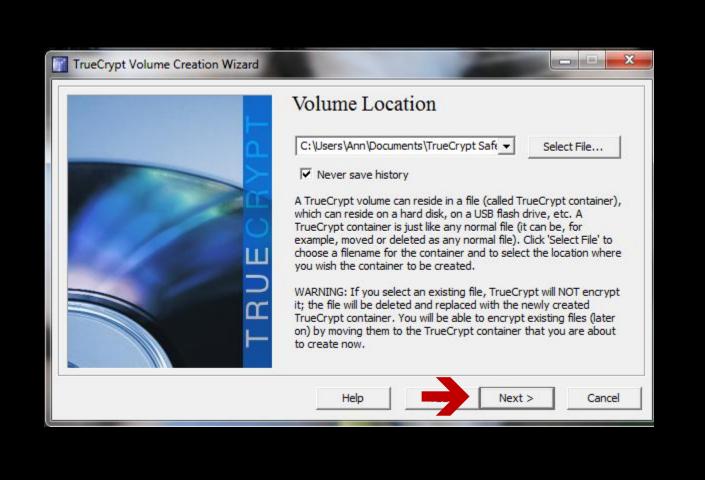

Next >

Cancel

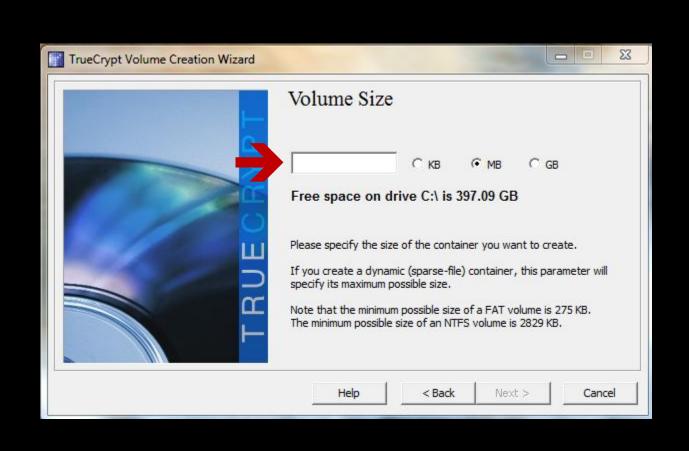

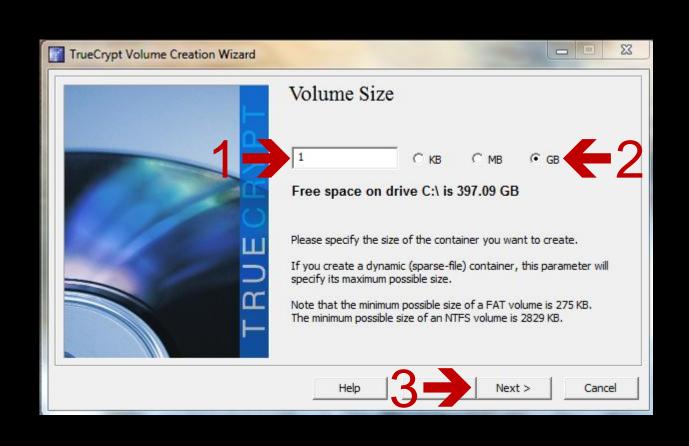

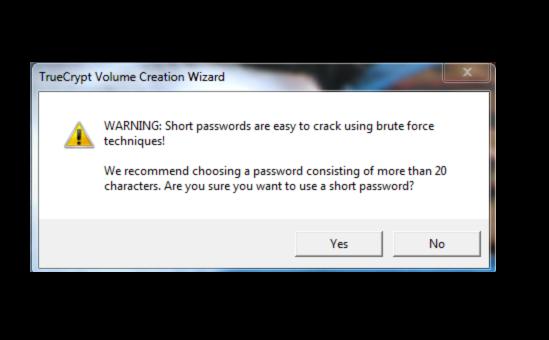

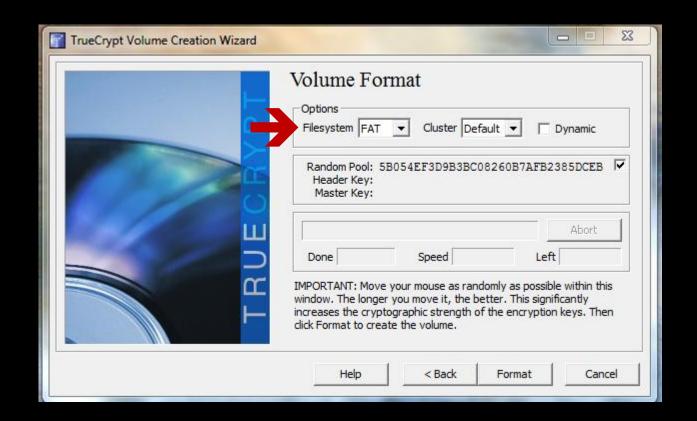

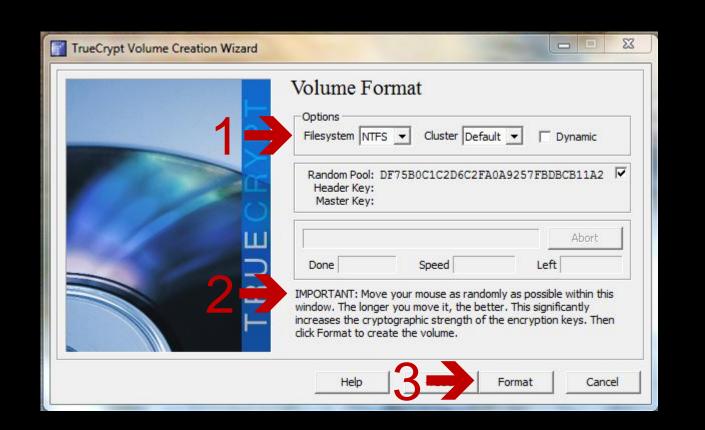

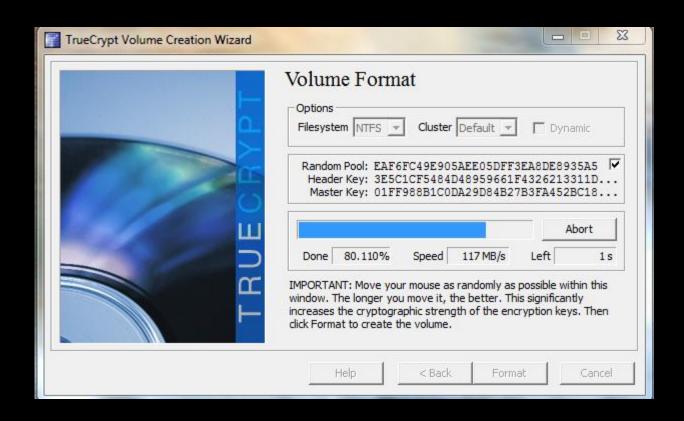

#### FAT is default... use device format (NTFS)

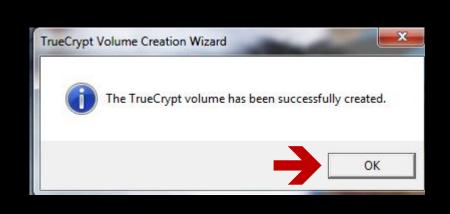

For an explanation of these file systems, see...

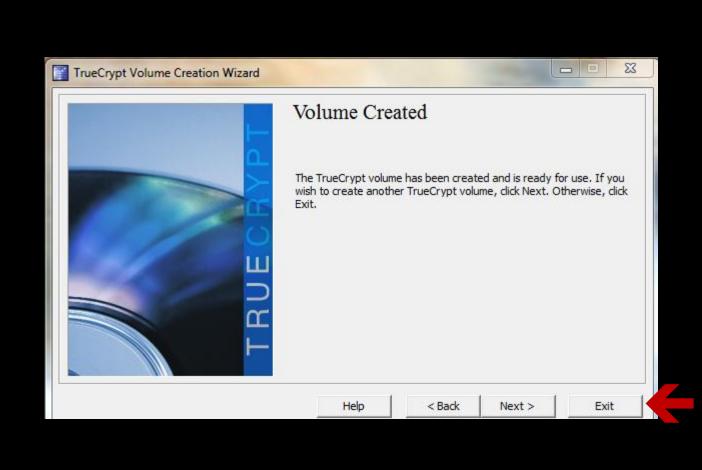

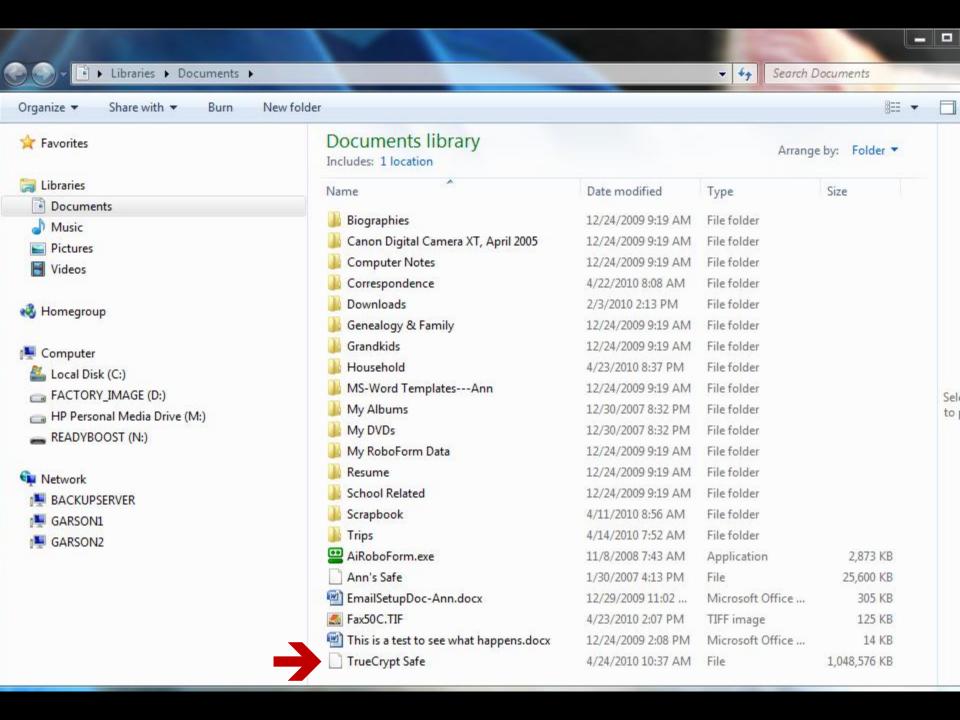

#### NOTE: Win-7 users may be prompted for Administrator password

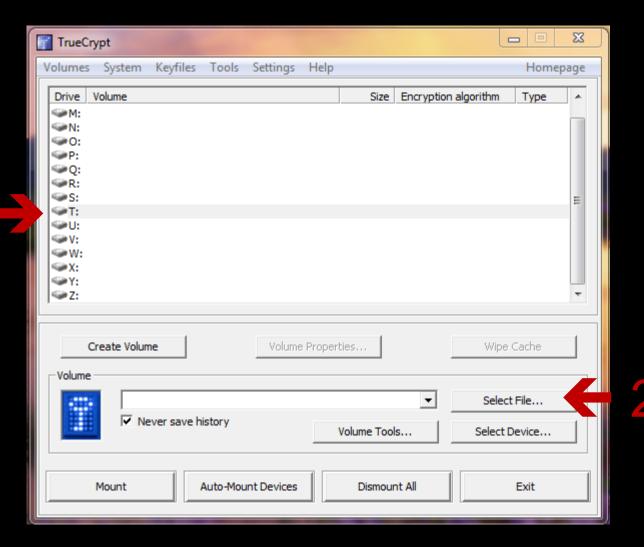

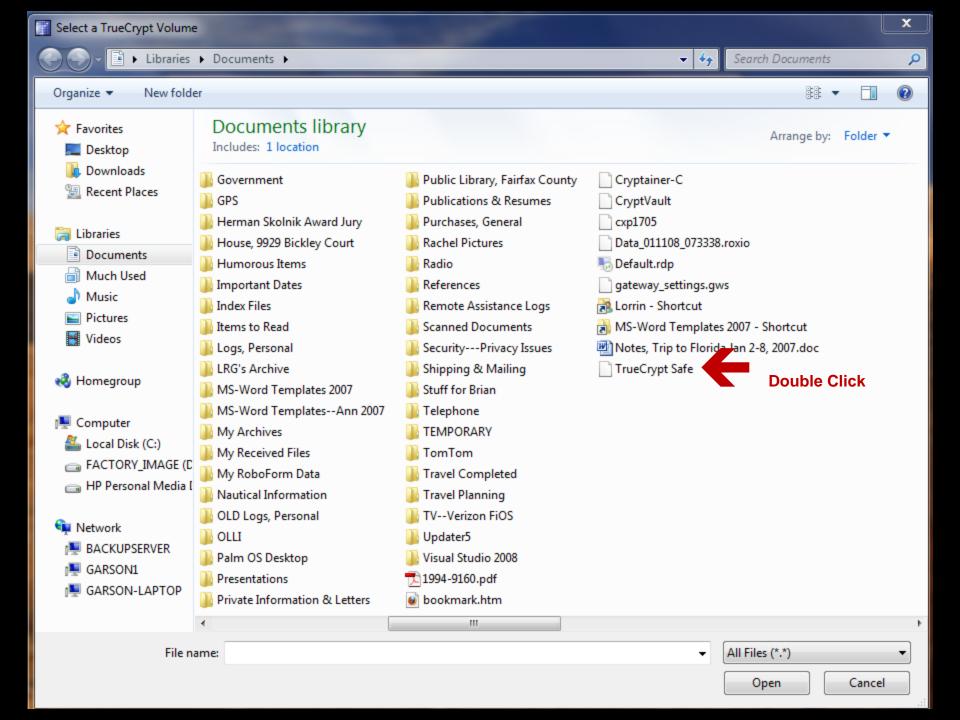

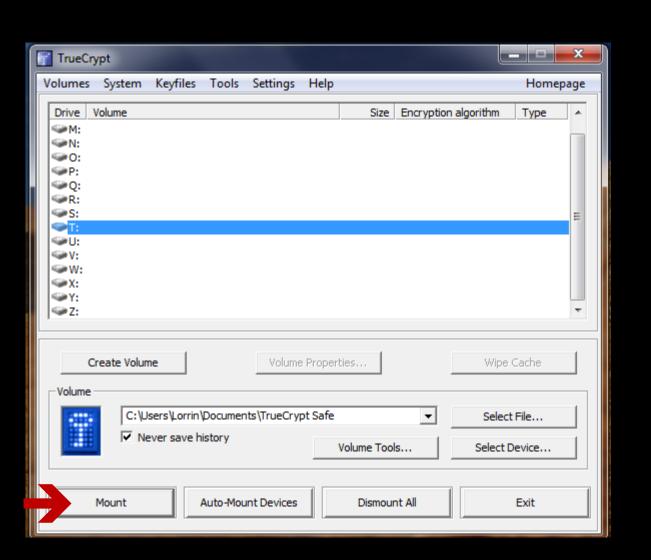

# Using a TrueCrypt Safe

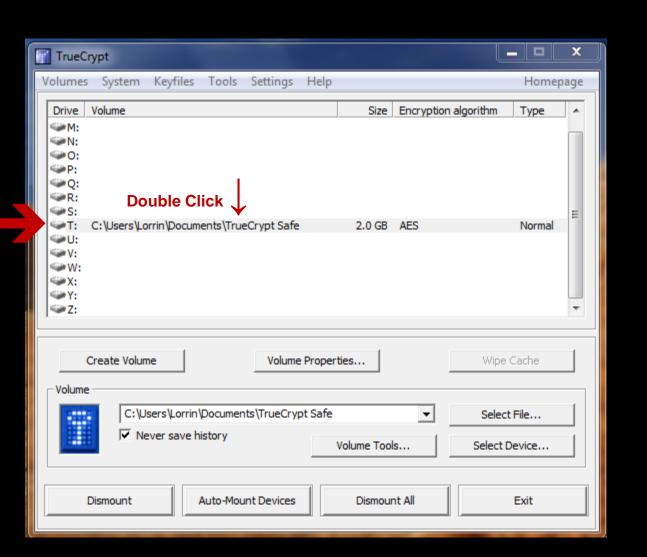

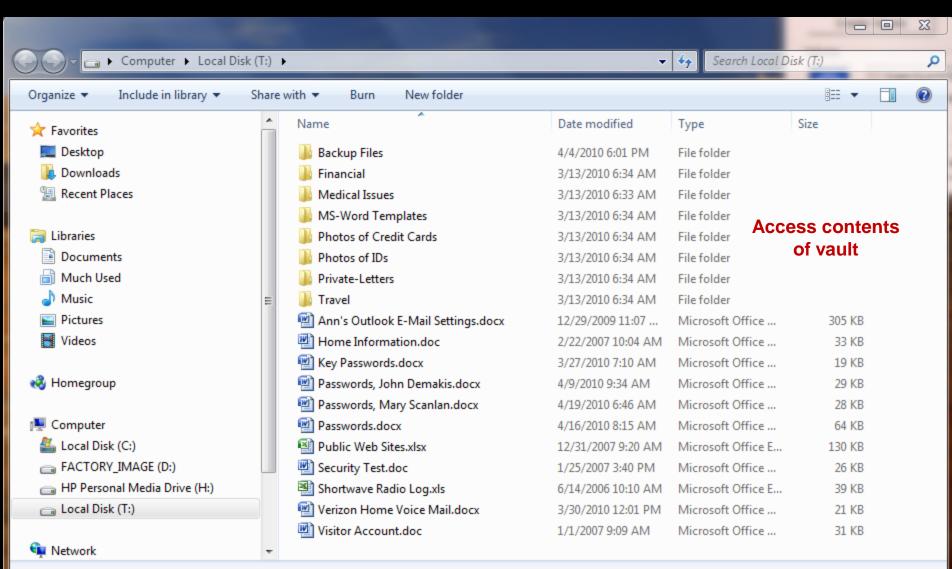

Password:	Cache passwords and keyfiles in memory  Display password		OK
			Cancel
	Use keyfiles	Keyfiles	Mount Options

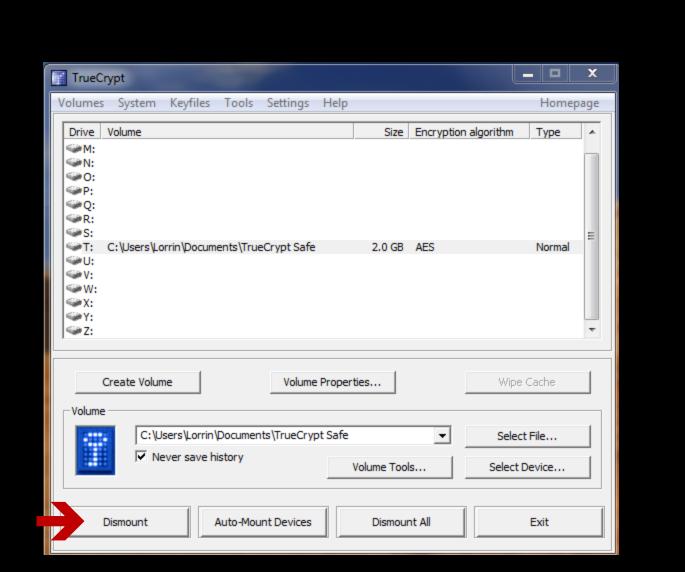

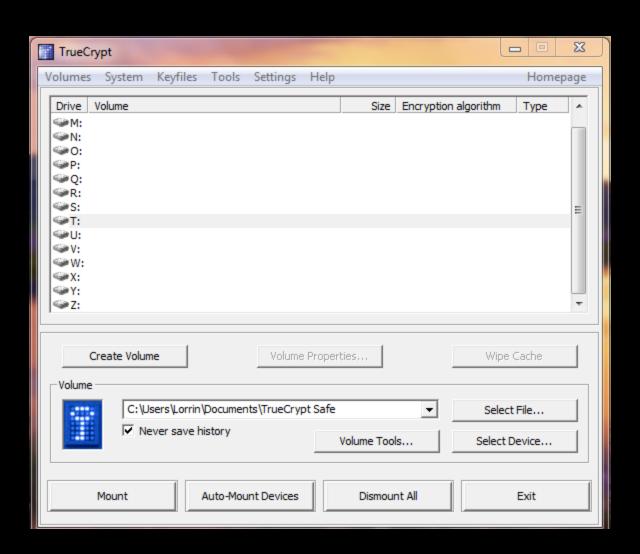

# Closing a TrueCrypt Safe

#### TrueCrypt Vault is Closed

## A Word of Caution!

- With either Cypherix or TrueCrypt, create or save sensitive documents only within vaults
- Sensitive files/folders created on nonsecure media — then placed in vaults are vulnerable on the non-secure media

### You Can't Be Too Careful...

"Just because you're paranoid does not mean someone isn't out to get you!"

Mildly paranoid friend

### In conclusion, you never know...

Who's watching
OR
Who's listening!

## Thanks For Your Attention!
